DETAILED ACTION

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-15 and 25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Timm and Corte et al and Klipper et al.

3. Claims are rejected for reasons as presented to and affirmed by the Board of Appeals. Newly added limitations to the claims are all taught specifically in reference to Timm and do not affect the issue of combination of the references as argued by applicants. The porogens are taught in column 4, the requirement for styrene, the amount of initiator and amount of polyvinyl aromatic monomer are all exemplified. The claims, therefore, continue to be properly rejected under 35 U.S.C. 103 as obvious over the cited references.
